

Scenario:

Customer tries to transfer ₹50,000.

Transaction failed.

Error shown: "Transaction could not be completed."

Expected discoveries in chatGPT using CoT

1. Insufficient available balance
2. Daily/per-transaction transfer limit exceeded
3. Incorrect beneficiary or account details
4. Bank/payment-network outage or temporary technical issue
5. Account restrictions, KYC issues, or security/fraud checks
6. Recipient bank rejecting the transaction
